

The new INNOVA M24 has arrived! It has a beautiful new sleek and colorful design sure to be appealing to the quilters sense of sophisticated style. The industrial quality that is the benchmark of INNOVA construction remains, while there are many new innovative hardware and software features streamlining the INNOVA M24 setup and use.

The INNOVA M24 integrates a new power supply box, eliminating the need for consumer purchased power surge protectors. It houses all the power needs of the Innova longarm systems, provides filtering, and simplifies wiring.

Addition of AutoPilot is effortless with plug-in components at the rear of the machine.
